You are the opportunity

Technical Production Specialist (m/f/d)

Part of the bioeconomy, Stora Enso is a leading global provider of renewable solutions in packaging, biomaterials, wooden constructions and paper. We believe that everything that is made from fossil-based materials today can be made from a tree tomorrow. Stora Enso has some 26 000 employees in over 30 countries. www.storaenso.com

The **Wood Products division** is a leading provider of innovative wood-based solutions. The product range covers all areas of construction, including massive wood elements and wood components. It also includes a variety of sawn timber goods and pellets for sustainable heating. The emerging product range of biocomposites addresses the opportunities to replace plastics in consumer goods and creates potential in various demanding exterior applications in a cost-competitive way.

For our **Operation Improvement Team**, we are looking for an experienced Technical Production Specialist (m/f/d), who will support the successful ramp up of our future coming projects with the main focus on technology and training the staff at production.

The position could be located at one of the following sites: **Ybbs (AT), Bad St. Leonhard (AT), Zdirec (CZ), Gruvön (SWE)**

Your tasks and responsibilities:

- Full responsibility together with local production management that the startup on production shifts and machinery progresses as planned according the ramp-up plan
- Supporting the local mill organization to ramp up of the production and maintenance ~~on factory floor level~~
- Establishing training plans and activities for team leaders and operators. Participating actively in the execution of the trainings
- Supporting in daily problem solving communication between steering system supplier, production line and Stora Enso IT
- Deep technical interest and knowledge of e.g CLT technical solutions
- Develop an efficient set up for knowledge transfer and learning of the staff on the new production site
- Supporting and coordinating the creation of needed training material and structure it to fit into used e-learning system
- Supporting continuous development of existing operations and best practice sharing when non of above is priority

Your qualifications and experience:

- Capable to work in dynamic project environment
- Good technical understanding and interest of the functionalities of the lines
- Experience on technical project work is an advance
- Interest to develop own CLT and other production technology knowledge on expert level
- Autocad basic knowledge
- Motivating and inspiring personality
- Ability to get things done through others
- Strong leadership and management skills
- Very structured working approach and good self-management
- Interested in coaching and training new skills and target oriented working style to operators
- Interested in developing training practices and supporting standard practices, documentation and systems
- Capability to work in international teams and independently
- Proactive, result oriented, willing to take initiative and responsibility
- Good English skills (any other language is an advantage)
- Willingness to travel on a regular basis

What we offer:

- We are building a sustainable future for the world and you will be part of it
- Working in an international, friendly and dynamic team
- Challenging and varied tasks and responsibilities
- A performance-related salary based on your qualifications, professional experience and market value. (Minimum collective agreement: € 1 870,93)

If you are interested in being part of a renowned industrial company and would like to work in a performance- and value-oriented motivated team, then we look forward to receiving your detailed application.
